BORISSOV, IGOR N

ART UNIT	PAPER NUMBER
----------	--------------

3639

DATE MAILED: 05/18/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/031,405	Applicant(s) AMONG ET AL.	
	Examiner Igor Borissov	Art Unit 3639	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 February 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-13, 71-139, 152-158 and 164 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-13, 71-139, 152-158 and 164 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Applicant's election without traverse of Claims 1-13, 71-139, 152-158 and 164 filed on 2/28/2006 is acknowledged. A complete reply to the current Office action must include cancellation of nonelected claims (37 CFR 1.144) See MPEP § 821.01.

Claims 140-151 and 159-163 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Response to Amendment

Amendment received on 7/11/2005 is acknowledged and entered.

Claims 14-70 have previously been canceled. Claims 1-8, 10-13, 71-89, 113, 126, 130 and 131 have been amended. New claims 152-164 have been added. Claims 140-151 and 159-163 have been withdrawn from the application as being drawn to a non-elected invention (See above). Claims 1-13, 71-139, 152-158 and 164 are currently pending in the application.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 89-112 and 130-139 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 89 recites:

"A computer-implemented *system* for selecting a final option, comprising:

a plurality of *parameters*, each of said parameters *configured* to store information;

a plurality of components simultaneously presented in a display of a computer, each of said plurality of components displaying at least one of said plurality of parameters in said display;

a plurality of options calculated by the computer in response to said information, each of said plurality of options comprising at least one sub-option having a value corresponding to selected ones of said plurality of components...;

wherein said system is executed by software instructions, said software instructions are recorded on computer-readable medium”, which is confusing.

First, a “*parameter*” and “*option*” are not structural elements, but abstract values which can be imagined by a human or calculated by a computer, and, therefore, cannot be “configured”.

Second, language as to: “executed by software instructions, said software instructions are recorded on computer-readable medium” indicates an attempt to claim a computer readable medium. A question may be raised how many statutory classes are presented in the claim. Therefore, claim 89 is considered indefinite.

Independent claim 130 recites:

“A user interface implemented on a computer for selecting an option, having a first screen that comprises:

a first object implemented by the computer comprising at least one field for a user to enter information corresponding to an itinerary;

a second object implemented by the computer comprising a plurality of components indicative of corresponding travel options, each of said components having at least one parameter that receives parameter information from a user, and each of said travel options having a plurality of sequential destinations;

an activation object that transmits via a communication system said information entered by said user in said first and second objects to a processor that monitors and determines availability of a sub-option corresponding to one of said plurality of

components, said processor generating a plurality of options in accordance with an inventory level of each of said plurality of components.”

Claim language appears to recite computer-readable instructions which when implemented by a computer causing the computer to implement the method steps as recited in the claim. In order to implement computer-readable instructions on a computer, said computer-readable instructions have to be embedded in a computer-readable medium. However, there is no indication in the claim that said computer-readable instructions are embedded in the computer-readable medium. Therefore, the claim does not recite computer-readable medium having instruction embedded therein. Furthermore, a question may be raised how many statutory classes are presented in the claim, because the term “user interface” can be understood (or implemented) as a hardware. However, the claim recites no structural element required for an apparatus claim. As such claim 130 is considered indefinite.

The remaining claims are rejected as being dependent on the rejected independent claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-13, 71-139, 152-158 and 164 rejected under 35 U.S.C. 102(e) as being anticipated by Dettlelback et al. (US 5,253,166).

Independent Claims

Claim 1. Dettlelback et al. (Dettelback) teaches a method for reservation of travel packages, comprising:

displaying a plurality of components received in a client computer, each of said plurality of components having a parameter (Figs. 3 and 4);

selecting by a client at least one of the plurality of components (C. 4, L. 45-50);

manipulating by the client information for at least one parameter of the at least one selected component (C. 4, L. 45-50);

transmitting by the client computer to a server said manipulated parameter information received from said client for said the at least one selected components (C. 3, L. 65 – C. 4, L.25);

calculating by the server a plurality of options, each of said plurality of options comprising at least one sub-option that corresponds to a value of one of said the at least one selected components, the at least one sub-option is selected in accordance with said received manipulated parameter information, each of the at least one sub-option represents inventory manipulated by a seller in real-time (obtaining current data indicates real-time environment) (Fig. 3; C. 12, L. 9);

receiving by said client computer from said server the calculated plurality of options (C. 3, L. 65 – C. 4, L.25);

creating by the client a final option based on selecting at least two sub-options from at least two of the received plurality of options and requesting by the client a reservation of the created final option

transmitting by the client computer to said server said created final option and the reservation request (C. 3, L. 65 – C. 4, L.25);

transmitting by the server to the client computer the generated confirmation (C. 5, L. 39; C. 7, L. 59).

Claims 71, 89 and 113. Dettlelback teaches a method and system for reservation of travel packages, comprising:

displaying a plurality of components at a client computer, at least some of said plurality of components having a parameter (Figs. 3 and 4);

selecting by a client at least one of the displayed plurality of components (C. 4, L. 45-50);

manipulating by the client information for at least one parameter of the at least one selected component (C. 4, L. 45-50);

receiving by the server from the client computer a first input signal having the selected components and the manipulated at least one parameter (C. 4, L. 45-50; C. 3, L. 65 – C. 4, L.25);

calculating by the server a plurality of options, each of said plurality of options having a sub-option comprising a value corresponding to one of said plurality of components, and said value is generated in accordance with said user-determined value of said parameter (Fig. 3);

receiving by the client computer from the server the calculated plurality of options (Fig. 3; C. 3, L. 65 – C. 4, L.25);

selecting by the client various sub-options from at least two of the plurality of options (Figs. 3 and 4);

receiving by the server from the client computer the selected various sub-options (Figs. 3 and 4; C. 3, L. 65 – C. 4, L.25);

creating by the server the customized travel package comprising a plurality of destinations corresponding to said components in an itinerary having a single price (Figs. 3 and 4);

receiving the created customized travel package by the client computer from the server for displaying the customized travel package to the client (Figs. 3 and 4; C. 3, L. 65 – C. 4, L.25).

Claim 113. Dettlelback teaches a system for reservation of travel packages, comprising:

a first processor (Fig. 1A; C. 3, L. 65 – C. 4, L.25);

a second processor (Fig. 1A; C. 3, L. 65 – C. 4, L.25);

wherein said first processor is configured to display:
a first object implemented comprising at least one field for a user to enter information corresponding to an itinerary (Figs. 3 and 4);
a second object comprising a plurality of components indicative of corresponding travel options, each of said components having at least one parameter that receives parameter information from a user, and each of said travel options having a plurality of sequential destinations (Figs. 3 and 4);
an activation object (Figs. 3 and 4);
and wherein said first processor is further configured to transmit said information entered by said user to said second processor, said second processor is configured to generate a plurality of options in accordance with an inventory level of each of said plurality of components (Figs. 3 and 4; C. 3, L. 65 – C. 4, L.25).

Claims 152, 155 and 158. Dettlelback teaches a method, a computer-readable medium having computer-readable instructions for implementing said method, and system for reservation of travel packages, comprising:

displaying by a computer a plurality of travel groups, each group comprising a combination of a plurality of components, said combination being different from other of the at least two travel groups and said plurality of components comprising air travel, hotel accommodations, and car rental (Figs. 3 and 4);

receiving by the computer a first client selection comprising a travel group and information input by the user for every desired component of the travel group (C. 4, L. 45-50; C. 3, L. 65 – C. 4, L.25);

calculating by the computer travel packages, each of the travel packages comprising a value for each component in the selected travel group based on the information input by the user (Fig. 3);

displaying by the computer the calculated travel packages (Fig. 3);
receiving by the computer a second client selection of components selected from the displayed travel packages, at least two of the selected components are selected from different displayed travel packages (Figs. 3 and 4);

creating by the computer a customized travel package based on the second client selection (C. 2, L. 40-45);

displaying by the computer the created customized travel package (Fig. 3).

Dependent Claims

The remaining dependent claims are rejected on the same rationale as rejected independent claims.

Response to Arguments

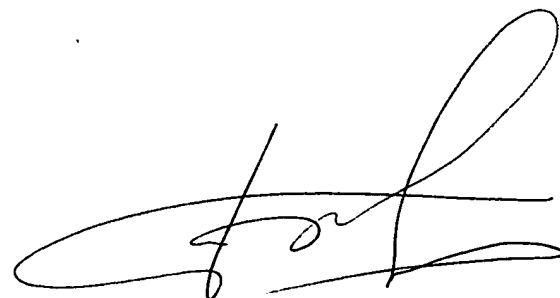

Applicant's arguments with respect to claims 1-13, 71-139, 152-158 and 164 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Igor Borissov whose telephone number is 571-272-6801. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Hayes can be reached on 571-272-6708. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
